

Automotive Contaminant Control Made EASY

IMPROVE THE PERFORMANCE OF YOUR PARTS BLOWOFF SYSTEM WITH THE NEW IQ EASY LP STATIC NEUTRALIZING BAR

In the fast-paced world of automotive OEM manufacturing, achieving cleanliness is non-negotiable. While air blowers play a crucial role in removing contaminants, adding the **Simco-Ion IQ Easy LP Static Neutralizing Bar** takes contaminant control to the next level.

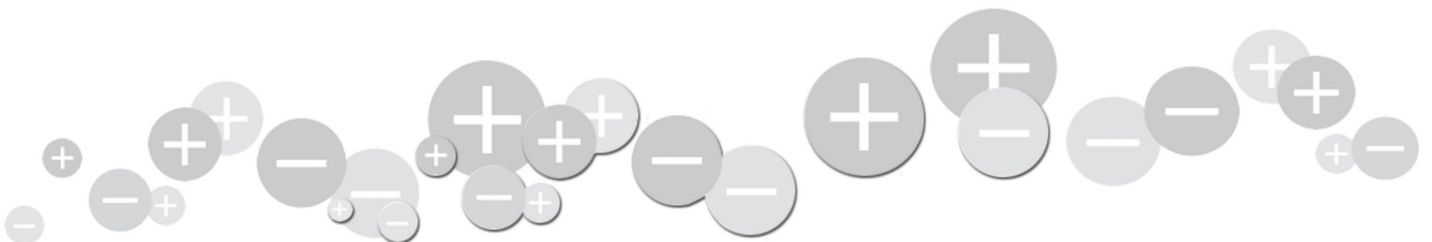

IQ Easy LP 24V Static Neutralizing Bar

The Next Level of Easy

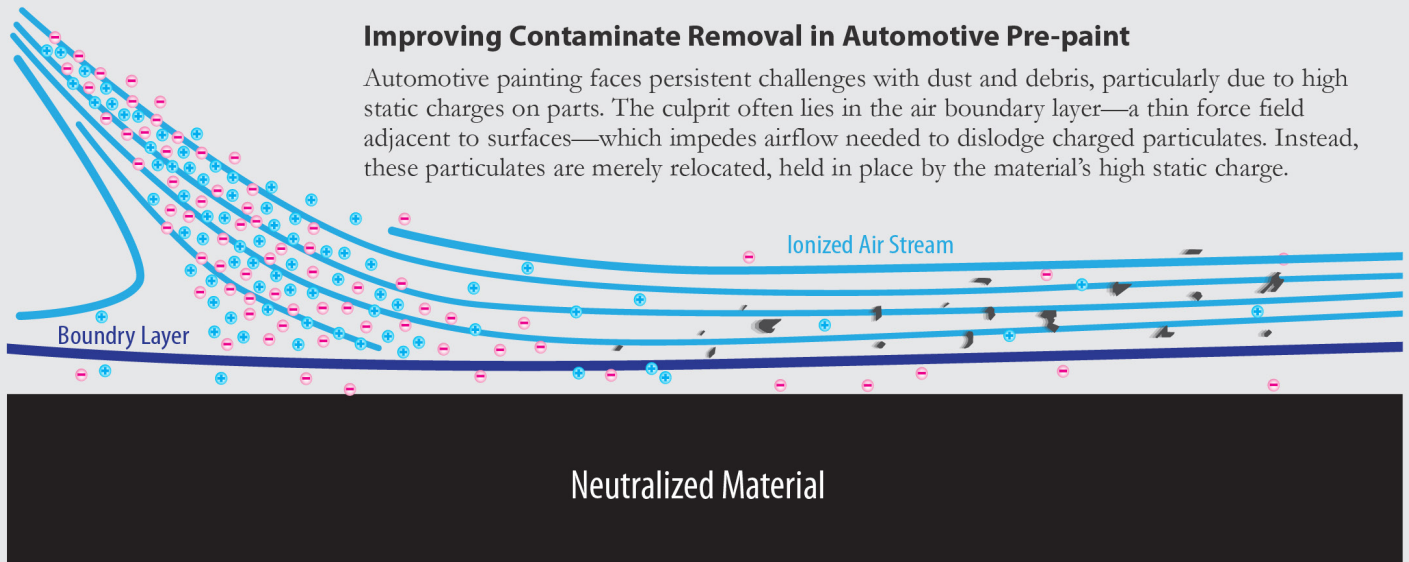

- **Break Static Bond:** Eliminate stubborn static charges that trap contaminants, ensuring thorough cleaning and superior quality.
- **Effortless Contaminant Removal:** Work smarter, not harder with Simco-Ion Intelligent ionization.
- **Maximized Performance:** The patented IQ Easy LP Static Neutralizing Bar offers the optimal combination of voltage and tungsten emitter pins to flood your workspace with ionization resulting in optimal contaminant control.
- **Low Profile Design:** Compact at 3/4-inch (19 mm) height, seamlessly integrates onto the air hoods while its industrial construction and IP66 rating ensure longevity in demanding applications.

Elevate Your Manufacturing Processes With Our Comprehensive Contaminant Control Solutions.

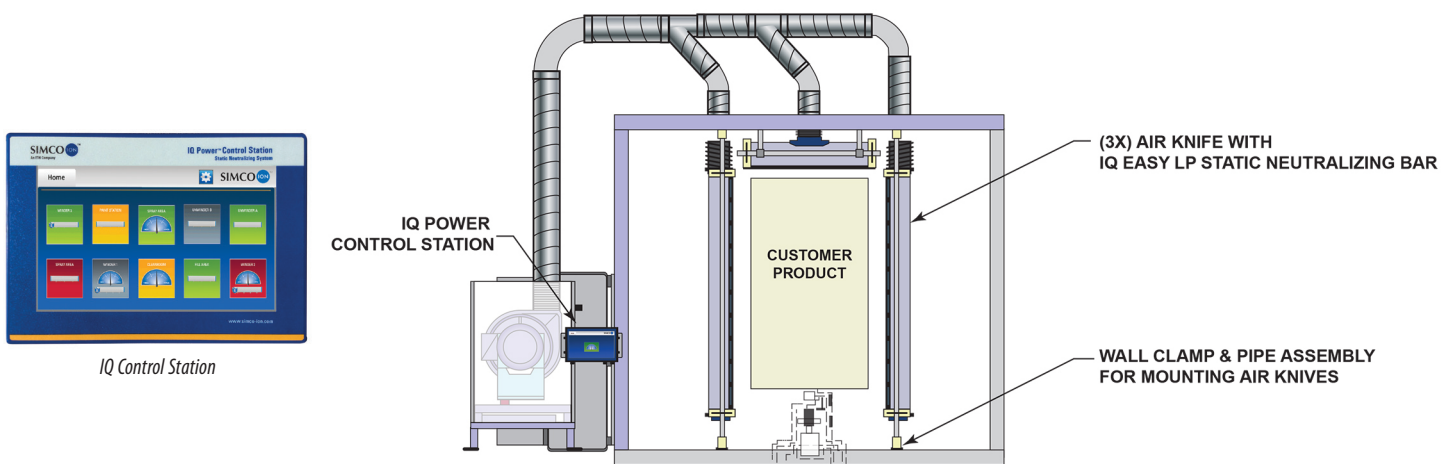

Improving Contaminate Removal in Automotive Pre-paint

Automotive painting faces persistent challenges with dust and debris, particularly due to high static charges on parts. The culprit often lies in the air boundary layer—a thin force field adjacent to surfaces—which impedes airflow needed to dislodge charged particulates. Instead, these particulates are merely relocated, held in place by the material's high static charge.

Experience Unparalleled Contaminant Control and Flawless Paint Finishes with Simco-Ion's Innovative Solutions

- **High-Performance Design:** The IQ Easy LP Neutralizing Static Bar utilizes advanced DC technology to neutralize static charges and facilitate the removal of bonded contaminants in OEM manufacturing environments.
- **Proximity to Ground Reference Hood:** Designed to work in close proximity to a ground reference, the IQ Easy LP Neutralizing Static Bar ensures optimal performance and precise static control in paint applications.
- **Ionization Output:** Floods the surrounding area with ionization output, effectively neutralizing static charges and enabling the efficient removal of contaminants.
- **Optimized Contaminant Control:** By eliminating the static bond and facilitating airflow, the IQ Easy LP Static Neutralizing Bar provides unparalleled contaminant control, resulting in cleaner, higher-quality products.
