An ITW Company

# Teknek SCH Cleaner Range

An ITW Company

The SCH range has been developed to provide a simple way of “applying best practice” to clean high value, thin web applications. This sector originally used a roller only system which does not achieve the results demanded. The SCH allows you to upgrade to the Teknek cleaning core – suitable for Dry Film, Optical films, Diffuser films, FCCL, Security films, Hot stamping foils.

## TEKNEK CLEANING CORE - made in Teknek

The Cleaning Core is the most important and unique aspect of any Teknek cleaning machine.

Knowledge

Innovation

Value

Without the “core” it’s only a conveyor

FEATURES	BENEFITS
Teknek Cleaning Core – complete transfer of contamination away from the web	Highest performance cleaning system available worldwide
Narrow profile, light weight rollers – easy to install where the roller turret system is	For easy installation in small areas. Low rolling resistance – process 10 micron webs – replace existing system
No Wrap angle required	No Scratching, No regrinding , no tracking of web
Lightweight rollers only touch the web	Low rolling resistance, no stretching films
Easy access to Cleaning Core	Reduced down time, no operator training
Nanoclean non leaching core available	No change to contact angle of film
Low cost of ownership	No regrinding of rollers required
